Passionate and dedicated Computer Science student with comprehensive knowledge of the MERN stack . Seeking an internship position to apply and enhance my web development skills in a dynamic and innovative environment. Eager to contribute to real-world projects, collaborate with experienced professionals, and grow my technical expertise.

Projects

Ecommerce Website   Live Link

Developed a full-featured e-commerce platform leveraging the MERN stack, facilitating seamless product browsing, purchasing, and order management.

Web Projects   Live Link

A user-friendly website offering a diverse collection of beginner-friendly projects with an intuitive admin panel for seamless project management.

Authentication   Github Link

Engineered a robust authentication system utilizing the MERN stack and Redux for state management, ensuring secure user access and data protection.

Portfolio Webite   Live Link

Showcase your skills with a personalized portfolio website featuring an admin panel for managing projects, accessible only to the admin

Memories   Github Link

Create and manage personal memories with date tracking on our MERN stack application, where users can post and delete their entries.
